					Cause : The data in the save file or on the tape, diskette or optical volume did not match the specified parameters. Recovery : See the previously listed messages. If the restore operation is from diskette, tape or optical, display the contents of the volume using the appropriate display command specifying the DATA{*SAVRST} parameter. If the restore operation uses a save file, display the contents of the save file {DSPSAVF command}. Correct any errors and then try the request again.

					Message : Library Q400PRT507 not found.					
					Cause : The library specified for the save or restore operation does not exist on the system. Recovery . . . : Do one of the following and try the request again: If this is a save operation, correct the library name on the LIB parameter. If this is a restore operation, correct the library name specified on the SAVLIB or RSTLIB parameter, or use the Create Library {CRTLIB} command to create the library by specifying LIB{Q400PRT507}. If this is a restore operation and VOL{*SAVVOL} was specified, the save library must exist in the auxiliary storage pool specified on the RSTASPDEV parameter. If RSTASPDEV{*SAVASPDEV} and RSTASP{*SAVASP} are specified along with VOL{*SAVVOL}, then the save library must exist in the system ASP. To restore a library that is new to the system, specify VOL{*MOUNTED} instead of VOL{*SAVVOL}.
